

DISASTER RECOVERY AS A SERVICE

Soteria Cloud Advanced Disaster Recovery

Cloud recovery capability for when a site,
server, or workload cannot wait.

For organizations that need a stronger recovery posture than
backup alone can provide.

Executive issue: When infrastructure fails, recovery
speed depends on preparation, orchestration, and
clear ownership.

- 01 Improve resilience against site and infrastructure outages**
- 02 Create practical recovery options for priority workloads**
- 03 Reduce uncertainty during critical incidents**

EXECUTIVE BRIEF

Acronis
Cyber Protect Cloud

Complete cyber protection.

EXECUTIVE CONTEXT

The business reason this matters.

The brief frames the operational pressure, the commercial reason to act, and the outcomes leadership should expect from the Soteria Cloud approach.

BUSINESS ISSUE

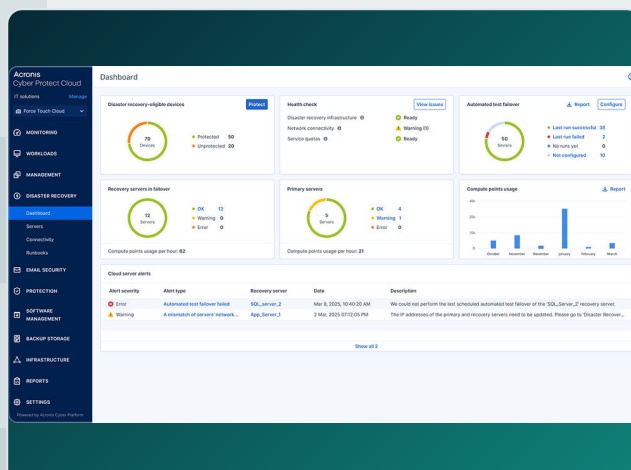

When infrastructure fails, recovery speed depends on preparation, orchestration, and clear ownership.

SOTERIA CLOUD POSITION

Cloud recovery capability for when a site, server, or workload cannot wait. Soteria Cloud packages the capability around business outcomes, operational ownership, and a clearer path from decision to adoption.

BEST FIT

- Critical server continuity
- Site outage planning
- DR readiness for regulated or business-critical services

From operational pressure to board-ready confidence.

Visual evidence and structured service packaging help buyers understand the path from risk to outcome.

01

Improve resilience against site and infrastructure outages

02

Create practical recovery options for priority workloads

03

Reduce uncertainty during critical incidents

DECISION PATH

How the offer becomes an executive outcome.

Soteria Cloud positions the capability as a managed operating model, not a disconnected tool purchase.

DECISION DRIVERS

Cloud recovery server options

Network and recovery planning

Failover and fallback support

Runbook design
