

SECURE BACKUP PLATFORM

Soteria Cloud Cyber Backup SCS

Secure, controlled backup for environments that need stricter deployment and operational boundaries.

For organizations with sensitive workloads, stronger control requirements, or self-managed backup architecture needs.

Executive issue: Some environments require backup control, deployment discipline, and security posture that goes beyond standard cloud SaaS.

- 01 Protect sensitive workloads with a controlled backup platform**
- 02 Support stricter operational and compliance requirements**
- 03 Keep recovery strategy aligned to security posture**

Back up, protect, and recover everything from a single cloud-native platform.

Complete Data Protection | Built-in Cybersecurity | Easy to Manage and Automate | Scalable for Any Business

EXECUTIVE CONTEXT

The business reason this matters.

The brief frames the operational pressure, the commercial reason to act, and the outcomes leadership should expect from the Soteria Cloud approach.

BUSINESS ISSUE

Some environments require backup control, deployment discipline, and security posture that goes beyond standard cloud SaaS.

SOTERIA CLOUD POSITION

Secure, controlled backup for environments that need stricter deployment and operational boundaries. Soteria Cloud packages the capability around business outcomes, operational ownership, and a clearer path from decision to adoption.

BEST FIT

- Sensitive workload backup
- Controlled backup architecture
- Security-led backup modernization

From operational pressure to board-ready confidence.

Visual evidence and structured service packaging help buyers understand the path from risk to outcome.

01

Protect sensitive workloads with a controlled backup platform

02

Support stricter operational and compliance requirements

03

Keep recovery strategy aligned to security posture

DECISION PATH

How the offer becomes an executive outcome.

Soteria Cloud positions the capability as a managed operating model, not a disconnected tool purchase.

DECISION DRIVERS

Secure backup management

Controlled deployment model

Workload backup and recovery

Administrative policy controls

PROOF POINTS

- Secure backup platform capability
