

HOSTING PLATFORM BACKUP

Soteria Cloud Hosting Backup

Backup for hosted websites, control panels, and customer hosting environments.

For hosting providers, web agencies, and service providers that need simple backup conversations for hosted workloads.

Executive issue: Web hosting data is business-critical, but customers often assume the hosting platform itself is a complete backup strategy.

- 01 Protect hosted sites and customer data**
- 02 Add recurring backup value to hosting services**
- 03 Improve recovery options for web workloads**

EXECUTIVE BRIEF

The graphic features a central screenshot of the Acronis Cyber Protect Cloud dashboard. The dashboard shows an overview with 2,835 protected workloads, a protection status of 'All protected (No issues)', and activity logs. It also displays workload counts for Servers (1,320), Workstations (1,275), and Mobile devices (240), along with storage information (2.4 TB total storage, securely stored in the cloud). Below the dashboard, three key pillars are highlighted: Risk (Identify and prioritize what matters most), Control (Apply proven protection across your environment), and Outcome (Ensure business continuity and drive better results). A large shield icon with a checkmark is positioned below these pillars. At the bottom, the text 'Secure. Compliant. Always Protected.' is followed by 'Back up, protect, and recover everything from a single cloud-native platform.' and four icons representing Complete Data Protection, Built-in Cybersecurity, Easy to Manage and Automate, and Scalable for Any Business.

Acronis
Cyber Protect Cloud

Complete cyber protection.
Simplified.

Dashboard

OVERVIEW: 2,835 Protected workloads

PROTECTION STATUS: All protected (No issues)

Back up, protect, and recover everything from a single cloud-native platform.

Complete Data Protection | Built-in Cybersecurity | Easy to Manage and Automate | Scalable for Any Business

EXECUTIVE CONTEXT

The business reason this matters.

The brief frames the operational pressure, the commercial reason to act, and the outcomes leadership should expect from the Soteria Cloud approach.

BUSINESS ISSUE

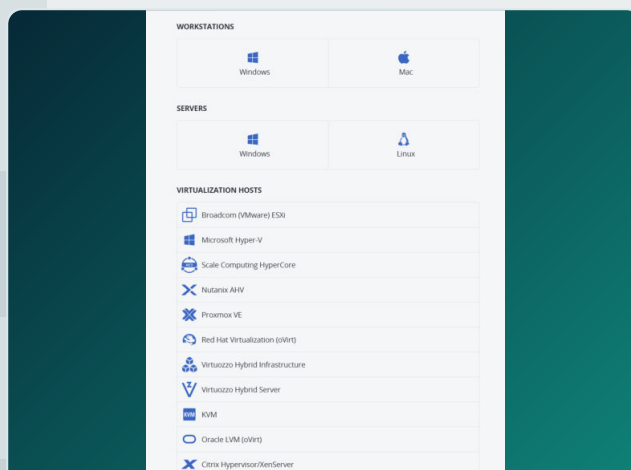

Web hosting data is business-critical, but customers often assume the hosting platform itself is a complete backup strategy.

SOTERIA CLOUD POSITION

Backup for hosted websites, control panels, and customer hosting environments. Soteria Cloud packages the capability around business outcomes, operational ownership, and a clearer path from decision to adoption.

BEST FIT

- **Managed website backup**
- **Hosting backup add-on**
- **Agency customer protection package**

From operational pressure to board-ready confidence.

Visual evidence and structured service packaging help buyers understand the path from risk to outcome.

01

Protect hosted sites and customer data

02

Add recurring backup value to hosting services

03

Improve recovery options for web workloads

DECISION PATH

How the offer becomes an executive outcome.

Soteria Cloud positions the capability as a managed operating model, not a disconnected tool purchase.

DECISION DRIVERS

Plesk backup extension

cPanel backup plugin

Website and hosting data protection

Customer self-service options

PROOF POINTS

- Acronis hosting backup extensions
- Soteria Cloud managed delivery
- Clear backup value for hosting and web customers
