

SOTERIA CLOUD SNAP DEPLOY

How to speed up workstation rollout

Fast, repeatable image deployment for standardized endpoint and lab environments.

Deployment automation

Acronis Snap Deploy

STARTING POINT

Manual device deployment wastes time, creates drift, and slows refresh projects.

For IT teams that need to roll out systems quickly without rebuilding each machine by hand.

Acronis Powered by Acronis

New workload and deployment workflow menu

STEP-BY-STEP PATH

Move from scope to validated service without losing the buyer's objective.

These are the decisions and checks Soteria Cloud uses to turn Acronis Snap Deploy capability into a practical service outcome.

01 Confirm objectives	Agree the business outcome, buyer priority, environment scope, and service owner.
02 Prepare access	Confirm the tenant, administrators, required integrations, and any customer approvals.
03 Apply the service	Enable the relevant Acronis-powered capability through the Soteria Cloud operating model.
04 Validate results	Check coverage, reports, alerts, exceptions, and user impact before broad rollout.
05 Review and improve	Use recurring service reviews to keep the protection model current and measurable.

KEY OUTCOME

Speed up workstation rollout. The service is shaped around the workloads, users, data, and risk profile that matter most.

SERVICE OWNER

Soteria Cloud

SCREEN CUES

Use the console views to confirm progress and explain the service clearly.

Fast, repeatable image deployment for standardized endpoint and lab environments. The screens below help buyers understand where scope, controls, and reporting evidence come from.

New workload and deployment workflow menu

Confirm services and scope

Review reporting evidence

Deployment automation scope has named owners and clear exclusions.

Required administrator access and customer approvals are confirmed.

Policies match the workload, user, data, and recovery risk profile.

Reports show coverage, exceptions, and action owners in plain language.

Soteria Cloud review rhythm is agreed for changes, incidents, and renewals.

BUYER CHECKPOINT

Before expanding the service, confirm that the buyer can see what is protected, what is excluded, what needs action, and how Soteria Cloud reports improvement.

OPERATIONAL FIT

Clear coverage, visible progress, and support when it matters.

The result is a protection approach customers can understand, fund, and measure through recurring Soteria Cloud reviews.

01

Speed up workstation rollout

02

Standardize device images

03

Reduce deployment effort for IT teams

Controls to put in place

- Image-based deployment
- Bare-metal provisioning
- Standard image management
- Deployment automation
- Multi-device rollout
- Deployment runbooks

Strong fit scenarios

- Lab and classroom refresh
- Branch workstation rollout
- Standardized endpoint replacement

SOTERIA CLOUD

Protection should be operational, not theoretical.

Soteria Cloud brings Acronis-powered capability together with onboarding, support, and recurring review.
