

SOTERIA CLOUD COMPLETE BDR

How to prepare for ransomware and downtime with complete BDR

Connect backup, continuity planning, and recovery readiness before a serious outage forces rushed decisions.

Business continuity

Acronis Cyber Protect Cloud and Disaster Recovery

Total Data Protection

BEST FIT

Business leaders, MSPs, and IT teams that need a clearer route from incident to restored operations.

A backup file is not a continuity plan. Businesses need a practical route from outage to restored operations.

Acronis Powered by Acronis

Backup and continuity readiness dashboard

DECIDE FIRST

Make the business choices clear before rollout.

Useful protection starts with the workloads, users, data, recovery targets, and risk decisions that shape the service.

01

Which services must come back first

02

Which workloads require continuity options beyond backup

03

Who can approve failover or recovery decisions

04

What communication is needed during an incident

05

How often readiness needs to be tested

06

Which dependencies could block recovery

Readiness checklist

- Identify revenue, operations, and customer-facing systems
- Map application dependencies and access requirements
- Set realistic recovery objectives for each priority group
- Confirm escalation contacts and decision authority
- Review backup, DR, and security evidence together

Gaps to close

- A backup plan with no continuity route
- Critical dependencies left out of the runbook
- Executives unclear on expected recovery sequence
- No test proving that priority systems can return

PRACTICAL PATH

Turn the requirement into an operating model.

Soteria Cloud surrounds Acronis technology with assessment, policy design, onboarding, review, and support ownership.

BUILD THE PRIORITY LIST	Identify the systems, users, data, and access paths that keep the business operating.
MAP DEPENDENCIES	Connect servers, SaaS data, network services, identities, and third-party systems that recovery depends on.
SELECT RECOVERY PATHS	Match each workload to backup recovery, cloud recovery, manual workaround, or staged restoration.
REHEARSE DECISIONS	Run tabletop reviews so leadership knows when to contain, recover, communicate, and escalate.
PROVE READINESS	Use Soteria Cloud reviews to track restore results, readiness gaps, and improvement actions.

Protect the systems that keep operations running

Track recovery readiness

Package evidence for service reviews

SOTERIA CLOUD OFFER
Soteria Cloud Complete BDR

POWERED BY
Acronis Cyber Protect Cloud and Disaster Recovery

SERVICE FIT
Best for buyers that want a business continuity plan with recoverable data, clear ownership, and measurable readiness.

OUTCOME

Shorten recovery conversations during incidents. The plan is stronger when controls, recovery expectations, and reporting evidence are connected from the start.

EVIDENCE

Measure the things that prove protection is working.

Good cyber resilience is visible. Buyers need coverage, exceptions, recovery confidence, and service actions they can understand.

01

Priority workloads mapped

02

Recovery sequence agreed

03

Restore or failover checks completed

04

Runbook gaps closed

05

Incident contacts verified

Business outcomes

- Shorten recovery conversations during incidents
- Protect production workloads with continuity goals in mind
- Give leadership a clearer resilience plan

Strong fit scenarios

- Ransomware recovery planning
- Server failure and site disruption readiness
- Executive continuity assurance

SOTERIA CLOUD

All your data. One strategy. Zero compromise.

Backup, continuity, and recovery packaged for real downtime events. Delivered with Soteria Cloud onboarding, support, reporting, and recurring review.
