

SOTERIA CLOUD PERSONAL ENDPOINT PROTECTION

How to protect executive and remote personal endpoints

Add practical backup and cyber protection for high-value personal devices outside the standard managed estate.

Individual device protection

Acronis True Image 2026

Total Data Protection

BEST FIT

Executives, remote workers, small offices, and buyers with important Windows or Mac devices.

High-value personal and executive devices often hold important data but are not always covered by business backup routines.

Cyber Protection

Endpoint backup and protection service view

DECIDE FIRST

Make the business choices clear before rollout.

Useful protection starts with the workloads, users, data, recovery targets, and risk decisions that shape the service.

01**Which personal endpoints hold important business data****02****How local and cloud backup will be balanced****03****Who assists with recovery when a user is remote****04****What data needs to be restored first****05****How device protection is checked over time****06****Which users need a simple protection add-on****Readiness checklist**

- Identify executives, remote workers, and high-value devices
- Confirm Windows and Mac backup expectations
- Set backup destinations and retention needs
- Define recovery support for lost or failed devices
- Review protection status with the user or service owner

Gaps to close

- Executive laptops outside managed backup scope
- Personal productivity files assumed to be in SaaS apps
- Remote recovery support undefined
- Mac and Windows needs handled inconsistently

PRACTICAL PATH

Turn the requirement into an operating model.

Soteria Cloud surrounds Acronis technology with assessment, policy design, onboarding, review, and support ownership.

IDENTIFY PRIORITY USERS	Find the users and devices where data loss would cause immediate productivity or business impact.
SET BACKUP APPROACH	Choose local, cloud, or combined backup based on device use, connectivity, and recovery expectations.
ENABLE PROTECTION	Apply Soteria Cloud guidance for device backup, cyber protection, and user-friendly recovery.
PREPARE RECOVERY	Clarify what happens after laptop failure, theft, ransomware impact, or accidental deletion.
REVIEW STATUS	Check backup health, storage, and recovery confidence on a recurring basis.

Soteria Cloud Personal Endpoint Protection

POWERED BY

Acronis True Image 2026

SERVICE FIT

Best for buyers that need a simple protection add-on for important personal and remote endpoints.

OUTCOME

Protect personal productivity data. The plan is stronger when controls, recovery expectations, and reporting evidence are connected from the start.

EVIDENCE

Measure the things that prove protection is working.

Good cyber resilience is visible. Buyers need coverage, exceptions, recovery confidence, and service actions they can understand.

Priority devices covered

02

Backup status healthy

03

Recovery path understood

04

Storage trend reviewed

05

Remote support route clear

Business outcomes

- Protect personal productivity data
- Support Windows and Mac backup needs
- Create an easy add-on for remote and executive users

Strong fit scenarios

- Executive laptop protection
- Remote worker device resilience
- Small office endpoint backup

SOTERIA CLOUD

All your data. One strategy. Zero compromise.

Personal-device backup and cyber protection for executives, remote workers, and high-value endpoints. Delivered with Soteria Cloud onboarding, support, reporting, and recurring review.
