

ACRONIS-POWERED. SOTERIA CLOUD DELIVERED.

Soteria Cloud Advanced Backup

Reliable backup that is designed around restore outcomes, not just retained copies.

Backup and recovery

Total Data Protection

Zero Downtime. Zero Data Loss.

PROTECTION OUTCOME

For organizations that need dependable protection for servers, workstations, virtual machines, NAS, and core business data.

Backups only matter when they can be restored quickly, cleanly, and at the right level of granularity.

Acronis Powered by Acronis

The screenshot displays the Acronis Cyber Protect Cloud management console. On the left, a sidebar shows navigation options: 'MONITORING' and 'DEVICES'. The main area is titled 'All devices' and contains a table of protected devices. A modal window titled 'New protection plan (1)' is open on the right, showing a list of advanced packs to be selected for the plan.

Type	Name	Source	Last backup
Virtual Machine	app1-centos6-bios-restored...	System	Never
Virtual Machine	app1-centos-7-x64-bios-bvYC	System	Never
Virtual Machine	app1-move-ubuntu-20-x64...	System	Never

Protected devices and backup management view

WHY IT MATTERS

Protection that connects technology to business resilience.

Backups only matter when they can be restored quickly, cleanly, and at the right level of granularity.

SOTERIA CLOUD OFFER

Reliable backup that is designed around restore outcomes, not just retained copies. Delivered as a Soteria Cloud service with onboarding, policy design, reporting, and local support.

UNDERLYING TECHNOLOGY

Acronis Advanced Backup

BEST FIT

For organizations that need dependable protection for servers, workstations, virtual machines, NAS, and core business data.

POSITIONING

Backup and recovery

01

Protect critical systems from deletion, corruption, and ransomware impact

02

Recover files, systems, and workloads with practical restore options

03

Build predictable recovery into the managed service model

CAPABILITIES

What Soteria Cloud delivers.

Acronis technology provides the engine. Soteria Cloud adds service ownership, local support, and a practical path from protection planning to recoverability.

Core capabilities

- Image-based backup
- File and folder recovery
- Physical and virtual workload support
- NAS backup options
- Policy-based retention
- Cloud storage aligned to Soteria Cloud protection plans

Common use cases

- Endpoint and server backup modernization
- Protection for branch offices and remote teams
- Backup standardization across multiple customers

Acronis-powered backup engine

Soteria Cloud local support

Fits into Total Data Protection bundles

SERVICE EXPERIENCE

From assessment to ongoing assurance.

Soteria Cloud helps customers move from risk and uncertainty to a managed protection service with clear onboarding, reporting, and support.

Backup assessment

Soteria Cloud reviews the environment, key risks, and resilience priorities before rollout.

Retention and recovery policy design

Protection requirements are mapped into practical settings, policies, and responsibilities.

Agent deployment and monitoring

The service is deployed with structured onboarding, visibility, and support ownership.

Restore testing and reporting

Ongoing reporting, recovery checks, and service reviews keep protection measurable.
