

ACRONIS-POWERED. SOTERIA CLOUD DELIVERED.

Soteria Cloud Snap Deploy

Fast, repeatable image deployment for standardized endpoint and lab environments.

Deployment automation

Total Data Protection

Zero Downtime. Zero Data Loss.

PROTECTION OUTCOME

For IT teams that need to roll out systems quickly without rebuilding each machine by hand.

Manual device deployment wastes time, creates drift, and slows refresh projects.

Acronis Powered by Acronis

The screenshot shows the Soteria Cloud web interface. On the left is a sidebar with navigation links: CLIENTS, MONITORING, MY INBOX (with a 23 notification badge), and REPORTS. The main content area is titled 'View: Cyber Protection' and contains a table with columns: Name, Tenant status, Management mode, and Billing mode. The table lists two entries: 'Partner Workspace 1' (Active, Full access, Service-based) and 'Soteria Cloud Internal' (Active, Full access, Service-based). A 'New' button in the top right corner has a dropdown menu open, showing options: Customer, Folder, Partner, and User. To the right of the table is a 'Configure services' button and a '7-day history' link. Below the table, a text label reads 'New workload and deployment workflow menu'.

Name	Tenant status	Management mode	Billing mode
Partner Workspace 1	Active	Full access	Service-based (per workload)
Soteria Cloud Internal	Active	Full access	Service-based (per workload)

WHY IT MATTERS

Protection that connects technology to business resilience.

Manual device deployment wastes time, creates drift, and slows refresh projects.

SOTERIA CLOUD OFFER

Fast, repeatable image deployment for standardized endpoint and lab environments. Delivered as a Soteria Cloud service with onboarding, policy design, reporting, and local support.

UNDERLYING TECHNOLOGY

Acronis Snap Deploy

BEST FIT

For IT teams that need to roll out systems quickly without rebuilding each machine by hand.

POSITIONING

Deployment automation

01

Speed up workstation rollout

02

Standardize device images

03

Reduce deployment effort for IT teams

CAPABILITIES

What Soteria Cloud delivers.

Acronis technology provides the engine. Soteria Cloud adds service ownership, local support, and a practical path from protection planning to recoverability.

Core capabilities

- Image-based deployment
- Bare-metal provisioning
- Standard image management
- Deployment automation
- Multi-device rollout
- Deployment runbooks

Common use cases

- Lab and classroom refresh
- Branch workstation rollout
- Standardized endpoint replacement

Acronis Snap Deploy capability

Soteria Cloud managed delivery

Complements endpoint protection and backup

SERVICE EXPERIENCE

From assessment to ongoing assurance.

Soteria Cloud helps customers move from risk and uncertainty to a managed protection service with clear onboarding, reporting, and support.

Deployment image planning

Protection requirements are mapped into practical settings, policies, and responsibilities.

Pilot rollout

The service is deployed with structured onboarding, visibility, and support ownership.

Technician enablement

The capability becomes part of a managed Soteria Cloud protection experience.

Repeatable deployment process

The service is deployed with structured onboarding, visibility, and support ownership.

OFFER NAME	Soteria Cloud Snap Deploy
POWERED BY	Acronis Snap Deploy
BUSINESS VALUE	Reduce operational risk, improve resilience, and simplify protection under a single Soteria Cloud service.
NEXT STEP	Book a Soteria Cloud protection assessment to map this offer into the customer environment.

SOTERIA CLOUD

All your data. One strategy. Zero compromise.

Protect every workload, every user, and every business-critical service with a clearer path to resilience.
